

Custom Adhesive, Sealant and Specialty Chemical Packaging

Services Provided:

- Package Materials Selection
- Labeling
- Bagging
- Hazardous Shipping
- Documentation
- Vacuum Degassing
- Centrifugal Degassing
- Nitrogen Purging
- Testing
- Custom Product Modifications

Your Partner for Custom Packaging

Kitpackers is the expert in chemical packaging. We specialize in the custom packaging of adhesives, sealants, coatings, lubricants, and specialty chemicals. Kitpackers' innovative packaging technology will increase efficiency, reduce production costs and provide easy, accurate dispensing solutions. At Kitpackers, integrity, quality and safety are at the forefront of our custom packaging solutions. We guarantee mix ratio, shelf-life and provide expert documentation as well as minimize chemical exposure.

Our 30 years of experience give us the ability to ask the right questions. We know how to recommend the right packaging for virtually any application. We also know how to avoid the pitfalls of air entrapment, moisture contamination and package incompatibility.

Centrifugal Degassing

Extensive Labeling Capabilities

Two Component Systems

Kitpackers specializes in the packaging of plural component reactive resin systems in convenient packages.

Sulzer Mixpac side-by-side cartridges in 50ml, 200ml, 400ml and 600ml in 1:1, 2:1, 4:1, & 10:1 ratios

TAH products from EFD Nordson are side-by-side cartridges available in 50ml, 200ml, 400ml and 600ml

Techkits come in barrier and injection styles for any ratio and are available in 2.5, 6, 8, 1/10th gal, & 20oz sizes.

Ratio-Pak side-by-side cartridges have the greatest variety of sizes and ratios available

Dual syringes from a variety of manufacturers from 5-30ml with other sizes ratios available

Flexible two component pouches with a clipped or burstable seal available in any ratio in sizes from 2ml to 180ml.

For Your Specialty

One Component Systems

Kitpackers stocks and packages a great variety of one component packages for precision dispensing.

Air & manual syringes from Fisnar, Techcon, EFD Nordson, Fishman and B & D in sizes from 1cc to 60cc

Disposable plastic cartridges for precision dispensing available in 2.5, 6, 8, 12, 1/10th gal, 20, 32oz

Flexible pouches made with clear and foil film in sizes from 2ml to 28ml.

Aluminum tubes 1, 3, and 5.4oz also grease tubes 3 & 14oz (not pictured)

Glass bottles square and round in sizes from 4ml to 32oz and many with brush caps available.

Metal cans round and rectangular some with brush caps 4oz to gallon.

Plastic bottles from 7cc to a gallon.

Plastic jars with lids from 1/2 to 32oz.

Chemical System

Premixed and Frozen

Premixed & Frozen plural component resins are the ultimate in convenience as well as quality control reliability and are provided in syringes and cartridges from 1cc to 500cc.

Silicone Fluids/Oils and Emulsions

Xiameter PMX200 Silicone Fluids stocked in 18 different viscosities and available in drums, pails, 500ml, and any custom package required.

Viscosity, Modification, Pigmentation, Glass Sphere/Density Modification

Viscosity, color, cure time, and performance enhancing modifications as well as blending of customer's formulas are available in any batch size and any package.

Repackaging Solution Provider

As an authorized packager of products from the demanding Adhesive and Sealant manufacturers listed below, Kitpackers supplies many of the world's leading Electronics, Defense, Transportation, and Industrial Assembly companies with complete chemical-packaging solutions meeting OEM quality standards.

AN ELLSWORTH ADHESIVES COMPANY

Kitpackers Custom Packaging Services

Kitpackers is a premier packager of one and two component industrial chemicals including adhesives, encapsulants, sealants, coatings, greases, lubricants, cleaners, primers and a variety of other specialty chemicals. We specialize in repackaging chemistries such as epoxies, silicones, urethanes, polysulfides, and acrylics. Kitpackers is fully prepared to handle, store, repackage and ship hazardous and temperature sensitive materials.

Kitpackers is equipped to modify batches of all sizes from quarts to totes and routinely mixes for viscosity or color modification. Additionally, we add various fillers, spacer beads and pigments. We have an analytical lab staffed with experienced chemists, who regularly provide batch qualification testing before and/or after packaging. Kitpackers provides Certifications, Test Reports, TDS's, and MSDS's and any other documentation required to meet your material specifications and ship your product domestically or internationally.

Experts in Chemical Packaging - Quality & Service

As a recognized industry leader, we partner with you to recommend the best packaging solution based upon your chemical and application needs. At Kitpackers, we are dedicated to serving the customer and exceeding their expectations. Our commitment to customer care is showcased by taking full responsibility for any material we repackage. We provide total support and quick response to any issues involving our products and services via our ISO 9001:2008 registered quality system and staff. Our partner locations throughout North America, Europe and Asia enable us to service multi-national manufacturers efficiently.
